Summary

Aspiring Software Engineer and Full-Stack Developer with strong foundation in Data Structures, Algorithms, and web development. Built responsive web applications using JavaScript, React.js, Node.js, and MongoDB. Solved 300+ coding challenges on LeetCode, GFG, and HackerRank. Passionate about creating intuitive and accessible user experiences.

Education

IIITJabalpur

BTech in Computer Science and Engineering

Aug2023–jul2027
March2021–March2023

St.Gabriel'sSr.Sec.School

Class XII – CBSE

Skills

Languages: C/C++, Python, JavaScript, HTML, CSS, PHP, Node.js, SQL

Frameworks: React.js, Express.js, MongoDB, TailwindCSS, Flask

DevOps & Tools: VS Code, Git, GitHub, Anaconda

CS Fundamentals: DSA, DBMS, Operating Systems, and OOP Principles

Projects

MyPortfolio

RestaurantOrderingandDeliverySystem

[Link2](#)

- MERN Stack
- Developed UI with React.js and REST APIs with Node.js/Express.js
- Used MongoDB to manage users, orders, menus, and delivery status
- Created an Admin Panel for menu management, order tracking, and delivery assignments
- Enabled real-time order updates

AIforCulturalRestoration–GroupProject

[Github2](#)

- Python, Stable Diffusion, LoRA, PyTorch — leveraged for building an AI-driven restoration pipeline.
- Implemented a custom mask generator to realistically simulate statue damage patterns for training.
- Achieved high-quality reconstructions with PSNR $\geq$ 28dB and SSIM $\geq$ 0.85, ensuring visual and structural fidelity.
- Optimized model efficiency by reducing training time by 40% using LoRA fine-tuning instead of full-model retraining.

OsseointegrationSimulationSystem

[Github2](#)

- Python • VPython • Tkinter • Flask • Matplotlib • Plotly
- Developed real-time cell and bone growth visualization using VPython
- Built a Tkinter GUI to show live graphs of osteoblast activity and bone formation
- Added a Flask web interface for user-driven simulation inputs
- Generated varied outputs: line graphs, histograms, heatmaps, bar charts, and 3D plots with Matplotlib/Plotly

Achievements

- Runner-up at **HackByte 2.0**, a college-level hackathon.
- Solved 400+ DSA problems on LeetCode
- [Contributed](#) to open-source repositories on GitHub
